Mriganka Das

Backend Engineer | Java & Spring Boot | Microservices | Automotive SaaS

9123961113 • mrigankadas1712@gmail.com • linkedin.com/in/das-mriganka • github.com/Mr1ganka

PROFESSIONAL SUMMARY

Results-driven Backend Engineer with 4 years of experience designing, shipping, and scaling Java Spring Boot microservices for high-traffic automotive SaaS platforms. Deep expertise in OTA firmware update pipelines, JWT/RBAC security, real-time telemetry ingestion, and microservice architecture migrations. Delivered measurable impact: 35% improvement in firmware success rates, 60% reduction in authentication incidents, and 30% lower request latency. Proven ability to own features end-to-end in fast-paced Agile teams with Kafka, Docker, AWS, and CI/CD pipelines.

CORE COMPETENCIES

Java • Spring Boot • Microservices Architecture • REST API Design • Apache Kafka • Event-Driven Architecture • JWT Authentication • Role-Based Access Control (RBAC) • OTA Update Pipelines • Real-Time Telemetry • JPA / Hibernate • MySQL • MongoDB • Redis • Docker • AWS (EC2, S3) • GitLab CI/CD • Test-Driven Development • Agile / Scrum

EXPERIENCE

Software Engineer 2 | Solera (DealerSocket) – Spireon | Nov 2023 – Present | Bengaluru, India

- Architected Spring Boot microservices powering OTA update management, device telemetry ingestion, and admin workflows across 10K+ active automotive devices.
- Engineered OTA management APIs with controlled rollouts, intelligent retry logic, and error-code-based recovery — boosting firmware update success rates by **35%** and cutting support tickets by **25%**.
- Built high-throughput real-time telemetry ingestion and dashboard APIs, enabling near real-time visibility into vehicle and device health across the fleet.
- Spearheaded JWT/RBAC authentication refactor across 5+ microservices, eliminating **60%** of authentication-related production incidents.
- Drove monolith-to-microservice migration of critical backend modules, improving system scalability and slashing average request latency by **30%**.
- Strengthened observability by integrating Kibana log monitoring and maintaining Swagger API documentation, accelerating developer onboarding across teams.

Associate Software Engineer | Solera (DealerSocket) – Spireon | Sep 2022 – Oct 2023 | Bengaluru, India

- Developed secure admin backend modules for brands, apps, accounts, dealers, and SSAs, enforcing role-based access control across all configurations.
- Delivered features end-to-end across 2-week Agile sprints, collaborating with frontend, QA, and product teams from design through production support.
- Increased test coverage via JUnit and Mockito unit tests, reducing recurring production errors and improving overall service reliability.

Associate Software Engineer | Selegic | Mar 2022 – Sep 2022 | Remote

- Designed and built REST APIs in Go (Gin, GORM) on NoSQL databases handling 1K+ daily operations; query optimisations improved response times by **25%**.
- Improved system stability through structured unit testing, reducing recurring production errors by **30%**.

TECHNICAL SKILLS

Languages: Java, Go, SQL
Frameworks: Spring Boot, JPA/Hibernate, Spring MVC, Gin, GORM
Architecture: REST APIs, Microservices, Event-Driven Architecture, SaaS / Multi-Tenant Design
Databases: MySQL, MongoDB, Redis, PostgreSQL
Messaging: Apache Kafka, RabbitMQ
Security: JWT, RBAC, OAuth2
DevOps & Cloud: Docker, AWS (EC2, S3), GitLab CI/CD, Maven, Kibana
Testing: JUnit, Mockito, RestAssured, TestNG
AI Tools: GitHub Copilot, OpenAI Codex, ChatGPT, Claude

PROJECTS

URL Shortener Service | Go, MongoDB, Docker

- Built REST APIs for URL creation, redirection, expiration, and click analytics with TTL-based auto-expiry in MongoDB, rate limiting, and concurrency-safe logic for high-load reliability.

Telemetry Ingestion Pipeline | Java, Spring Boot, Kafka, MongoDB

- Designed a real-time Kafka consumer pipeline with configurable consumer groups, dead-letter queue fault tolerance, and MongoDB persistence — achieving sub-100ms end-to-end processing latency.

EDUCATION

Bachelor of Technology in Computer Science & Engineering
Maulana Abul Kalam Azad University of Technology | Aug 2018 – Aug 2022
